

square

circle

rectangle

triangle

oval

rhombus

trapezoid

hexagon

## Descriptions

square – all four sides are the same size

circle – round – no sides or corners

rectangle – two long sides and two short sides

triangle – three sides and three corners

oval – like an egg – a squished circle

rhombus – like a diamond or kite

trapezoid – 4 sides – two of the side fall in – looks like a triangle with the tip cut off

hexagon – six sides
